

# Release Notes

MedCen 6.3 Build 236

**NEW!** You can now call toll free: 0800 MEDCEN (0800 633 236) to reach our helpline

## Reduced Prescriptions for 45-64 Year Olds

Patients in the 45-64 (inclusive) age group who are funded will now have the A4 code for reduced prescription charges printed on prescription slips, from the 1<sup>st</sup> of July 2006. Please follow the enclosed instructions "MedCen: Setting 45-64 age group consultation fees."

## Formulary Changes

This month we have included updated pharmacy drug tables for MedCen. These tables **will** overwrite your existing tables and you will lose any customisations such as special instructions. This is necessary because previous formulary updates that have had inaccurate data.

## Referral Writer

This month we have two changes from user requests:

-  Word wrap has now been restored (from a previous change), so that the when a line fills up to the page margin size, it will flow to the next line for "what you see is what you get" printing.
-  After selecting a document template, when the user changes to the Contacts list to choose a patient to insert details into the letter, the chosen template would default back to the first on the list, "Blank Rich Text". This has now been changed to remember the user's original selection.

## Other Changes

-  A Systolic Blood Pressure tailored report and a Cardiovascular Risk Assessment tailored report has been included (especially for South Canterbury practices) to allow screening for the relevant programme.
