Release Notes

MedCen 7.1 Build 200

Immunisation Fee Changes

As of the 1st of July 2008, Immunisation administration fees have increased from $19.61 including GST, to $20.16 including GST. This release will update all vaccine administration fee prices for you. After applying this update, be sure to finalise your claim schedules before administering any immunisations.

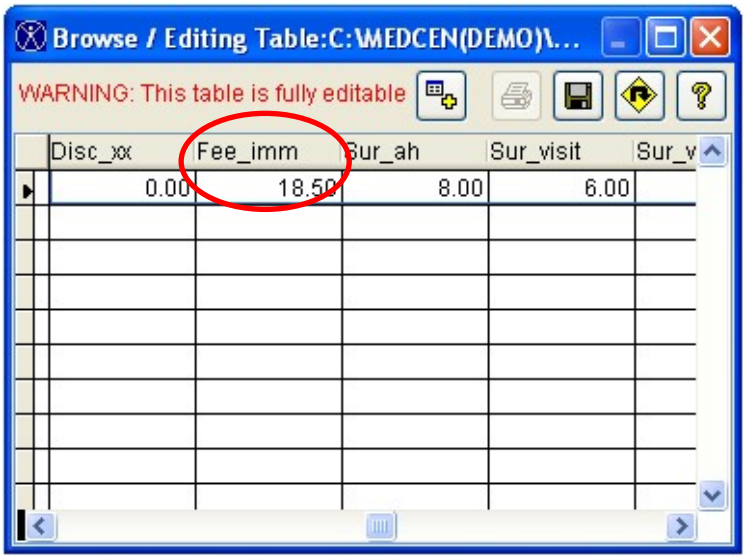
You will need to change the Immunisation Fee in the fee table. To do this, follow these instructions:

On the server go to the menu item **Tools->Advanced->Browse A Table**.

Find the table **`fees.dbf`** in your data directory (usually **`C:\MedCen\Data\`** on the server) and open it.

Use the horizontal scroll bar to scroll to the right until you find the field labelled **Fee_imm**.

Change the value in this field to **20.16** then click on the **Save** button to save your changes.



From the 'Wish List'

Every user can have a say about how they want MedCen to work for them. For each update, we try to include as many suggestions or requests that you have made. This update we included:

- Some users may have noticed an error occurring when running the Immunisation Recalls tool (in the menu **Tools->Recalls->Immunisations**). This error has been fixed.

- A Discretionary Funding Application Form and a Child Health Liaison Referral Form has been added to the Clinical Projects tab of the Clinical Data form. These forms have been designed to pre-populate with patient demographics so that you can just print and fax to the number on the form. This is for **Rural Canterbury practices only**. If you would like these forms for use in your area, please contact your PHO.
