

Release Notes

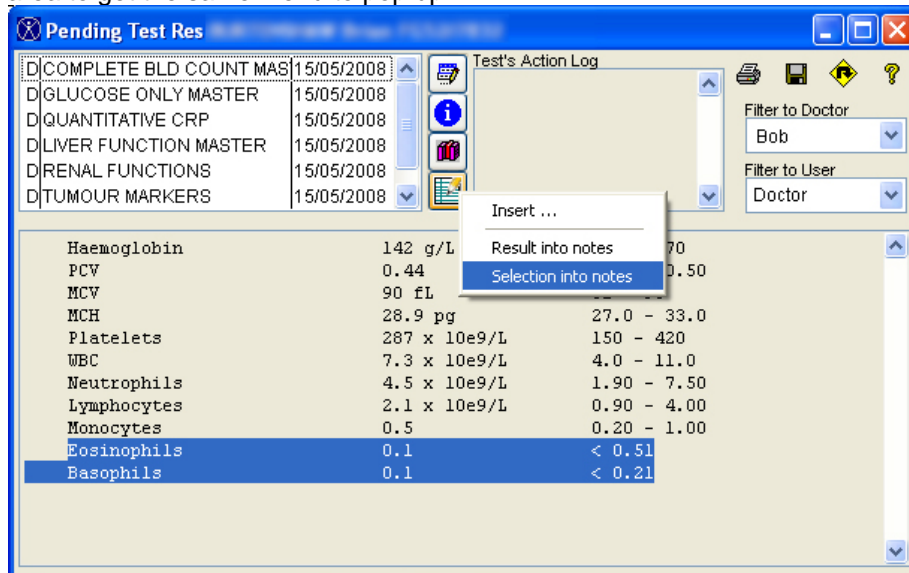

MedCen 7.1 Build 600

From the 'Wish List'

Every user can have a say about how they want MedCen to work for them. For each update, we try to include as many suggestions or requests that you have made. This update we included:

- There has been a new button added to the Pending Results window (when opening a lab result that is in the Inbox window). It has two options: Insert 'Result into notes', which allows you to insert the result into the Clinical Notes for that patient; Insert 'Selection into notes', which allows you to select some of the lab details area and insert that selection into the Clinical Notes. You can also right click on the lab details area to get the same menu to pop up.

No More Bugs!

Bugs can show up in software in many forms. Some will be minor, resulting in some unexpected behaviour. More serious bugs will cause error messages to appear or even cause the system to 'crash'. Let us know if you find any bugs and help us eliminate them! You can contact us by calling 0800 MED CEN (0800 633 236) or by emailing us at support@medcen.co.nz

Resolved Issues

- The address automatically inserted into a newly created letter did not contain the post code.
- Clinical Notes displayed using the 'Scroll Box' option displayed according to date but not by the time entered.
