

# Release Notes

MedCen 7.1 Build 880

## From the 'Wish List'

Every user can have a say about how they want MedCen to work for them. For each update, we try to include as many suggestions or requests that you have made. This update we included:

-  The Occupation field on the 'Demographics' tab of the 'Edit Patient' window has been expanded up to 30 characters to handle longer occupation descriptions.
-  A new tailored report has been included to show HPV Administrations. It allows you to choose the start and end dates for when the patients were born and shows how many doses of the HPV vaccine each patient has received.
-  The Capitation Based Funding Export Tool has an extra check that will be performed before generating the Age Sex Register file. This extra check will ensure there aren't any duplicate patients sent in the file that may affect your funding for those patients. We would recommend that you generate a test register as soon as possible after applying this update to identify any potential problems.

## No More Bugs!

**Bugs can show up in software in many forms. Some will be minor, resulting in some unexpected behaviour. More serious bugs will cause error messages to appear or even cause the system to 'crash'. Let us know if you find any bugs and help us eliminate them! You can contact us by calling 0800 MED CEN (0800 633 236) or by emailing us at [support@medcen.co.nz](mailto:support@medcen.co.nz)**

## Resolved Issues

-  Electronic invoices created by bestpractice decision support had not been saving the revenue receiver within the transaction table.
