

Release Notes

MedCen 7.1 Build 976

Vaccine Changes

For the last MedCen release, the Ministry of Health approved a change in MedCen that would result in all Influenza vaccinations triggering a message to be sent to the NIR as part of the 2010 Seasonal Influenza vaccine campaign.

Since that release we have been advised that the NIR is not currently capable of handling these types of messages and that this functionality needs to be turned off within PMS vendors.

This release will prevent the messages for Influenza vaccinations from being sent to the NIR, however you will still be able to record all NIR details, should the NIR request the information at a later date.

No More Bugs!

Bugs can show up in software in many forms. Some will be minor, resulting in some unexpected behaviour. More serious bugs will cause error messages to appear or even cause the system to 'crash'. Let us know if you find any bugs and help us eliminate them! You can contact us by calling 0800 MED CEN (0800 633 236) or by emailing us at support@medcen.co.nz

Resolved Issues

-  When inserting medications into a letter using the Letter Writing tool, all prescriptions would be displayed instead of just the regular prescriptions.
